

Prove your product

Leverage patient outcomes data to validate and differentiate your product in the market

Quantifying the value of your product

From gaining regulatory approval to conducting post-market surveillance and adverse event monitoring, getting the critical information you need to prove efficacy and value can be costly. With +10K active providers and +10M outcomes collected, PatientIQ is a powerful partner in maximizing the adoption of your product.

Powerful data to sell more product

Prove product efficacy

From regulatory bodies to medical providers and their patients, provide evidence of your product's efficacy.

Create market differentiation

Do more than claim quality - leverage outcomes data to showcase how your product delivers outcomes better than the rest.

Prove satisfaction

Your product exists to improve clinical outcomes. Leverage the voice of the patient to prove success and satisfaction.

The evidence you need - at a fraction of the cost

PatientIQ has the expertise and technology to get you the data you need - and ensure the process is cost-effective. Our EDC solution, [ResearchPRO](#), provides a comprehensive suite of services for companies of all sizes.
