

PatientIQ's Leadership Bios

Matt Gitelis

Founder & CEO

Matthew Gitelis is the Founder and Chief Executive Officer of PatientIQ, a leading healthcare analytics platform that automates the collection of patient-reported outcomes and derives actionable insights to advance data-driven medicine.

With a unique background blending finance, medicine, research, and technology, Matt drives the company's vision, strategy, fundraising, and product innovation. He began his career as an investment banking analyst at BMO Capital Markets, advising on mergers, acquisitions, and capital raises across North America. In his mid-twenties, driven by a desire for greater impact, he transitioned his career and enrolled at Rush Medical College. While in medical school, he founded PatientIQ in 2016 and conducted outcomes research at several leading academic medical centers in Chicago, gaining firsthand insight into healthcare data challenges—and becoming passionate about equipping frontline providers with the same sophisticated analytics tools available on Wall Street to improve patient outcomes. Matt is an author on more than 30 peer-reviewed publications and has presented at global academic meetings. He left Rush Medical College in 2019 to lead PatientIQ full-time. What began as a mission to modernize healthcare analytics has grown into a national PatientIQ network spanning more than 800 healthcare organizations and 12,000 sites of care, supporting over 14 million patients and collecting more than 50 million patient-reported outcomes.
